EXECUTIVE SUMMARY

The IAIS team comprises a range of professionals, from front-line Reliability Engineers to Maintenance Managers. Leveraging the capabilities within our team, we collaborate with you to develop and implement practical work plans tailored to meet your specific needs.

IAIS partners and associates have a proven capability in project development, plant, technical, and maintenance support, as well as reliability.

At IAIS, safety, health, and environmental performance are fundamental values and priorities that guide all our actions. We firmly believe that ensuring safe operational performance is a crucial prerequisite for sustainable operations and successful improvement and growth.

Our extensive industry experience includes business leadership in Carbon Anode plant maintenance and reliability, as well as a strong background in bulk water transfer, mobile equipment, and power generation. We have a solid track record in business improvement and maintenance performance turnaround for existing plants. Our team possesses deep engineering, technical, and commercial expertise, employing both modern and well-established technologies. IAIS offers clients comprehensive expertise in project delivery, including scoping, specification, commissioning, and asset operation.

We boast extensive industry supply chain knowledge and provide valuable commercial improvement capabilities to drive the development and support of strategic implementation in critical areas such as technical spares and operating supplies, contractor management, procurement, and HSEC.

WHAT WE DO

We collaborate with you to understand your requirements and establish clear deliverables. We design and select team capabilities based on your inputs and our available resources. Together, we work towards developing your team's independence and performance, ensuring long-term sustainability.

We believe in sharing delivery risks, including outcomes, costs, and timelines. Our approach involves a systematic process of diagnostics, evaluation, gap closure, and implementation plans.

As needed, we can integrate your team with IAIS resources. Our focus is on planning and implementing at the grassroots level, maximizing the potential for a successful outcome.

We utilize tools specifically designed to enhance the capabilities of both the client and IAIS team. Additionally, our extensive network and knowledge are at your disposal to assist in achieving positive results.

MISSION STATEMENT

Driving success through intelligent action

IAIS drives success through intelligent action by employing a strategic and purposeful approach in all aspects of our work. Here's how we accomplish this:

- 1. Intelligent Analysis:** We utilize advanced tools, methodologies, and data-driven insights to conduct thorough analysis and identify key opportunities, root cause, and trends. This intelligent analysis enables us to make informed decisions and develop effective strategies.
- 2. Informed Decision-Making:** We leverage our expertise and industry knowledge to make strategic decisions that align with our clients' goals and objectives. By considering various factors, risks, and potential outcomes, we ensure that our actions are well-informed and focused on driving success.
- 3. Proactive Problem-Solving:** We approach challenges with a proactive mindset, utilizing our analytical skills and creative thinking to develop innovative solutions. We take a holistic view of the situation, considering both immediate and long-term implications, and implement actions that address the root causes deviations.
- 4. Agile Implementation:** We embrace adaptability and agility to respond effectively to changing circumstances. By monitoring progress, evaluating feedback, and adjusting our strategies as needed, we ensure that our actions remain aligned with the evolving needs of our clients and the market.
- 5. Continuous Improvement:** We foster a culture of continuous learning and growth within our organization. Through ongoing professional development, staying updated on industry trends, and seeking feedback, we constantly enhance our knowledge and skills, enabling us to take action and deliver superior results.
- 6. Measurable Outcomes:** We focus on delivering tangible and measurable outcomes for our clients. By setting clear goals, defining key performance indicators, and tracking progress, we ensure that our actions are results-oriented and directly contribute to the success of our clients.

We continuously strive to improve and innovate, ensuring that our actions are purposeful, effective, and aligned with the goals and aspirations of those we aim to provide a service to.

IAIS VALUES

OUR VALUES IN ACTION

Innovation: Embracing innovation and leveraging solutions to identify new opportunities, analyze complex challenges, and implement effective strategies.

Accountability: Taking ownership and being accountable for our actions, decisions, and outcomes, ensuring that we deliver on our commitments.

Continuous Learning: Embracing a culture of continuous learning and growth, staying abreast of industry trends, new technologies, and best practices to drive informed action.

Adaptability: Being adaptable and agile in the face of change, embracing new challenges, and proactively adjusting strategies to drive success in dynamic and evolving environments.

Sustainability: Promoting sustainability in our actions and solutions, considering long-term impacts on the environment, society, and the economy.

Results driven: Focusing on delivering tangible results and measurable outcomes that drive success for our clients, aligning our actions with their strategic objectives.

OUR SUCCESS KEYS

1. Defining and agreeing improvement and development opportunities: We engage in a comprehensive assessment of the organization's current state and identify areas where improvements and developments can be made.

2. Identifying and managing risk: Risk management is a crucial aspect of our approach. We proactively identify potential risks and uncertainties that may impact the organization's objectives. Through thorough analysis and evaluation, we develop strategies to mitigate and manage these risks effectively.

3. Planning and implementing change: We recognize the need to embrace change and adapt to new circumstances. Our team collaborates with stakeholders to develop comprehensive change plans that encompass all necessary aspects, such as resource allocation, timelines, communication strategies, and training.

4. Eliminating value loss: We identify any areas where value may be lost, such as inefficiencies, waste, or suboptimal processes. Through careful analysis, we implement measures to eliminate these value-draining factors. This includes streamlining processes, optimizing resource allocation, and implementing best practices to enhance overall value creation.

5. Improving performance through control of plant, people, and process systems: Performance improvement is a key objective for us. We recognize that success is driven by effective management of plant (physical assets), people (human capital), and process systems.

6. Removing constraints to plant, people, and process delivery: We actively identify and address any constraints that may hinder the delivery of plant, people, and process operations. These constraints can include bottlenecks, resource limitations, technological gaps, or organizational barriers.

Overall, our approach encompasses a holistic understanding of the organization and its operations. We work towards continuous improvement, fostering a culture of innovation, collaboration, and excellence.

Who we are

Our Team

The IAIS team possesses a proven capability in **project development, plant management, and technical and operational support** across various industries. We place a strong emphasis on safety, health, and environmental performance, considering it a core value and top priority in all our endeavors. We firmly believe that ensuring safe operational performance is essential for **sustainable operations**, as well as for successful growth and improvement.

Our expertise spans a wide range of sectors, including bulk water transfer, power generation (diesel), anode manufacturing, anode baking, anode rodding, and rolling stock aluminum and Reduction mobile equipment. With a solid track record, the IAIS team has achieved **remarkable results in business improvement and turnaround of maintenance performance in existing plants/projects, utilizing both modern and established technologies.**

IAIS offers clients comprehensive proficiency in project delivery, power generation startup, and maintenance and reliability operations. Our team's capabilities encompass **scoping, planning, specification, commissioning, and operation of assets** such as anode plants, bulk water transfer systems, mobile equipment, rolling stock, technical procurement, and logistics. Additionally, we possess in-depth knowledge of the industry supply chain and **provide expertise in commercial improvement**, supporting strategic implementation in critical areas such as technical spares and operating supplies, contractor management, procurement, and controls.

Comprising recognized industry leaders, the IAIS team collaborates with clients to develop and **implement practical work plans tailored to their specific business needs.** We are always available for detailed discussions concerning our extensive capabilities and proven track record.

The challenges we solve

Plant Reliability

Designing highly reliable equipment requires a deep **understanding of reliability concepts**, the working principles of the equipment in question, desired performance levels, and the operational context in which the equipment will be utilized. IAIS is well-equipped to assist your company in **developing strategies to improve data quality**, forming a solid foundation for your **maintenance strategy**.

By collaborating with your company, we can identify critical assets and determine the appropriate strategies to employ. Furthermore, we can enhance the effectiveness of maintenance work by assisting in **task list development** and providing coaching and mentoring to maintenance teams. IAIS can also aid in the development of **reliable metrics** for **tracking performance**.

Working alongside our customers, IAIS can help identify opportunities to **increase equipment redundancy**, thereby enhancing overall system reliability. Additionally, we can improve the training and skills of operators and maintenance tradespeople, while also **fostering a culture of reliability improvement** within your organization.

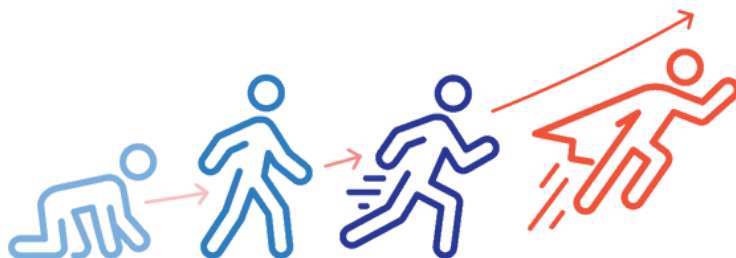

Maintenance Optimization

We offer assistance in proactive maintenance to ensure alignment among all stakeholders. This encompasses the following areas:

1. Maintenance and reliability best practices
2. Scope writing for repairable items
3. Developing task lists, method statements, and risk assessments
4. Implementing maintenance technician best practices
5. Applying maintenance planning, scheduling, and shutdown optimization best practices
6. Considering the impacts of maintenance planning and scheduling, such as wrench-time, human error, and maintenance costs
7. Implementing best practices for maintenance materials management
8. Conducting root cause analysis
9. Implementing preventive and predictive maintenance strategies
10. Analyzing maintenance costs by asset
11. Assessing the current state of your maintenance process and providing suggestions for improvement

We also assist in creating a **Master Plan**, starting with the identification of quick maintenance wins, and then utilizing the Crawl, Walk, Run methodology to **gradually implement improvements**.

Procurement Logistics

IAIS can assist in adopting advanced and improved technology through the provision of replacement spares and equipment. We are capable of supporting **supplier evaluations** and selecting the appropriate vendors that align with your requirements while offering competitive pricing. Our expertise includes **negotiating prices** and terms to ensure favorable outcomes.

Furthermore, IAIS excels in **vendor and supplier management**, encompassing risk assessment and ensuring the **quality of spares or services provided**. We have the necessary capabilities to effectively oversee the entire supplier relationship, from initial selection to ongoing monitoring and evaluation.

How you, as client will benefit

Access to Advanced Technology: By assisting clients in adopting later and better technology, IAIS enables them to stay ahead of industry trends and advancements. This can lead to improved operational efficiency, increased productivity, and enhanced competitiveness in the market.

Reliable Replacement Spares and Equipment: IAIS ensures that clients have access to high-quality replacement spares and equipment. This helps in maintaining the reliability and performance of their assets, minimizing downtime, and reducing the risk of costly breakdowns.

Cost Savings: Through supplier evaluations and negotiations, IAIS helps clients secure favorable pricing and terms. This can result in significant cost savings in procurement, reducing overall operational expenses and improving profitability.

Technical Development

In the realm of technical development, IAIS can offers:

- 1. Expertise in Advanced Technologies:** IAIS keeps pace with the latest advancements in technology and possesses a deep understanding of your practical applications. We can assist clients in identifying and implementing cutting-edge technologies relevant to your industry, allowing you to stay at the forefront of innovation.
- 2. Customized Solutions:** IAIS understands that each client has unique technical requirements. We provide tailored solutions that align with your specific needs, taking into account factors such as industry standards, operational constraints, and budget considerations.
- 3. Research and Development Support:** IAIS can collaborate with clients on research and development initiatives, offering technical expertise, resources, and guidance throughout the process. This can include conducting feasibility studies, prototyping, testing, and refining new ideas or technologies.
- 4. Process Optimization:** IAIS has a strong focus on process optimization, helping clients enhance operational efficiency and effectiveness. We analyze existing workflows, identify bottlenecks and areas for improvement, and propose optimized processes and workflows to streamline operations.
- 5. Training and Skill Development:** IAIS offers training programs and workshops to enhance the technical skills and knowledge of clients' teams. This can include areas such as equipment operation, maintenance best practices, data analysis, and emerging technologies. By investing in the professional development of their workforce, clients can improve overall technical capabilities and performance.
- 6. Continuous Improvement:** IAIS emphasizes the importance of continuous improvement in technical development. We work closely with clients to establish feedback loops, monitoring systems, and performance metrics to track progress and identify opportunities for further optimization and innovation.

The IAIS team places a strong emphasis on health, safety, environmental performance as core values and top priorities in all our endeavors. Ensuring safe operational performance is essential for sustainable operations, as well as for successful growth and improvement.

To uphold these values, the IAIS team has established comprehensive standards and controls across their areas of expertise, which include:

Health and Safety

- Implementing robust safety management systems and procedures to mitigate risks and prevent incidents
- Providing comprehensive safety training and competency development for all personnel
- Establishing clear roles, responsibilities, and accountabilities for health and safety performance
- Regularly reviewing and updating safety protocols to align with industry best practices and regulatory requirements

Environment

- Developing and executing environmental management plans to minimize the impact of operations on the surrounding ecosystem
- Implementing resource efficiency measures and promoting the adoption of sustainable practices
- Ensuring compliance with all applicable environmental regulations and standards

By rigorously upholding these standards and controls, the IAIS team demonstrates its commitment to responsible and sustainable operations, while also contributing to the overall well-being of the communities it serves.

Leadership Coaching

1. Personalized Coaching Approach: IAIS understands that effective leadership coaching requires a personalized approach. We tailor our coaching programs to the specific needs, goals, and challenges of individual leaders.

2. Leadership Development Framework: IAIS employs a comprehensive leadership development framework that encompasses various aspects of leadership, including self-awareness, communication, decision-making, problem-solving, team building, and strategic thinking. Our coaching programs are designed to develop and strengthen these key leadership competencies.

3. Emotional Intelligence and Self-awareness: IAIS recognizes the importance of emotional intelligence in effective leadership. We help leaders develop self-awareness, emotional regulation, empathy, and social skills. By enhancing emotional intelligence, leaders can better understand and manage their own emotions and those of their team members, leading to improved relationships, collaboration, and overall leadership effectiveness.

4. Communication and Influencing Skills: IAIS focuses on enhancing leaders' communication and influencing skills. Effective communication is essential for inspiring and motivating teams, providing clear direction, and fostering a positive and productive work environment. We provide coaching in areas such as active listening, empathy, effective feedback, and persuasive communication techniques.

5. Leadership Presence and Executive Impact: IAIS helps leaders develop a strong leadership presence and executive impact. We focus on enhancing their executive presence, confidence, and ability to inspire and influence others. This includes coaching on executive communication, executive-level presentations, and building a strong personal brand as a leader.

The value we bring

Your ROI

The return on investment (ROI) that you as a client can expect when utilizing the services and expertise of the IAIS Team will depend on several factors specific to each engagement.

Here are some potential areas where you can realize a positive ROI:

- 1. Improved Operational Efficiency:** IAIS specializes in identifying and implementing opportunities for process optimization and efficiency improvements. By streamlining operations, eliminating waste, and enhancing productivity, clients can experience cost savings and increased output.
- 2. Enhanced Maintenance Performance:** IAIS's expertise in maintenance optimization and reliability can lead to reduced downtime, improved asset utilization, and extended equipment lifespan. This can result in cost savings, increased production capacity, and improved overall equipment effectiveness (OEE).
- 3. Effective Project Delivery:** IAIS's project management capabilities ensure efficient project execution, adherence to timelines, and effective cost control. By minimizing delays, cost overruns, and rework, clients can achieve their project objectives within budget.
- 4. Safety and Environmental Performance:** IAIS's focus on safety, health, and environmental performance helps clients mitigate risks, avoid costly incidents, and comply with regulatory requirements. By preventing accidents, minimizing environmental impact, and maintaining a safe workplace, clients can avoid potential liabilities and reputational damage.
- 5. Strategic Procurement and Supply Chain Optimization:** IAIS's expertise in procurement and supply chain management can help clients optimize their processes, negotiate favorable contracts, and identify cost-saving opportunities. By reducing procurement costs, improving supplier relationships, and enhancing inventory management, clients can achieve cost efficiencies and a positive ROI.

Location

IAIS **serves clients across the globe**, providing our services to organizations in various countries and regions. With our widespread reach and global presence, we have the capability to support clients regardless of their geographical location. Our team of experts is accustomed to working with clients from diverse cultural backgrounds and industries, bringing a wealth of international experience to every engagement.

Whether you are located in North America, Europe, Asia, Australia, or any other part of the world, IAIS is well-equipped to deliver our services effectively and efficiently, ensuring that our clients receive the support they need, no matter where they are located.

Our commitment to serving clients worldwide allows us to contribute to their success and help them achieve their goals on a global scale.
